NORMALIZACIÓN DE LA FIRMA EN ISI Y SCOPUS

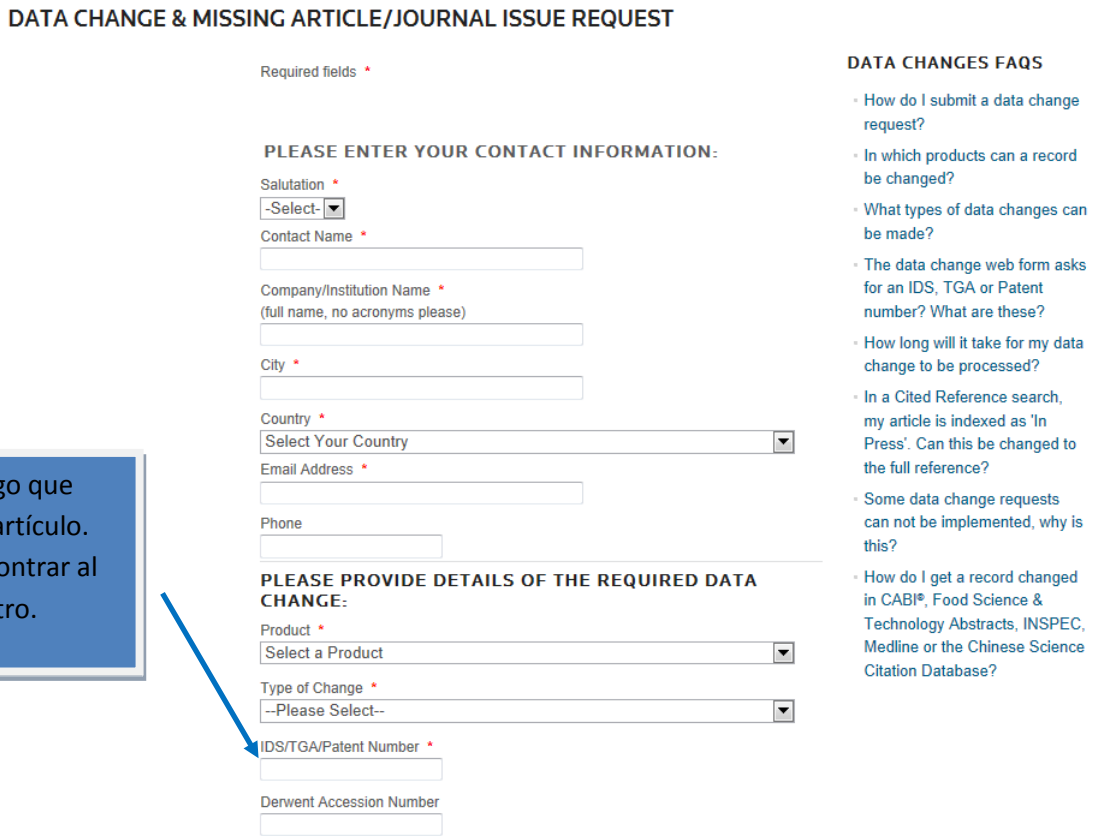
La diversidad de formas en las que muchos investigadores introducen en sus escritos los nombres de los centros de trabajo, de las áreas científicas y de sus propios apellidos, conduce en muchas ocasiones a perder información muy valiosa, en perjuicio del investigador y del análisis de los datos con fines de política científica.

Es importante firmar siempre de la misma forma, y evitar el uso variable de uno y dos apellidos.

Cómo modificar nuestra firma en ISI Web of Science

Para solicitar cambios en la base de datos Web of Science de ISI, hay que cumplimentar este formulario ("Request a data change"):

(http://ip-science.thomsonreuters.com/techsupport/datachange/)



DATA CHANGE & MISSING ARTICLE/JOURNAL ISSUE REQUEST

Required fields *

PLEASE ENTER YOUR CONTACT INFORMATION:

Salutation * -Select-

Contact Name *

Company/Institution Name * (full name, no acronyms please)

City *

Country * Select Your Country

Email Address *

Phone

PLEASE PROVIDE DETAILS OF THE REQUIRED DATA CHANGE:

Product * Select a Product

Type of Change * --Please Select--

IDS/TGA/Patent Number *

Derwent Accession Number

DATA CHANGES FAQS

- How do I submit a data change request?
- In which products can a record be changed?
- What types of data changes can be made?
- The data change web form asks for an IDS, TGA or Patent number? What are these?
- How long will it take for my data change to be processed?
- In a Cited Reference search, my article is indexed as 'In Press'. Can this be changed to the full reference?
- Some data change requests can not be implemented, why is this?
- How do I get a record changed in CABI®, Food Science & Technology Abstracts, INSPEC, Medline or the Chinese Science Citation Database?

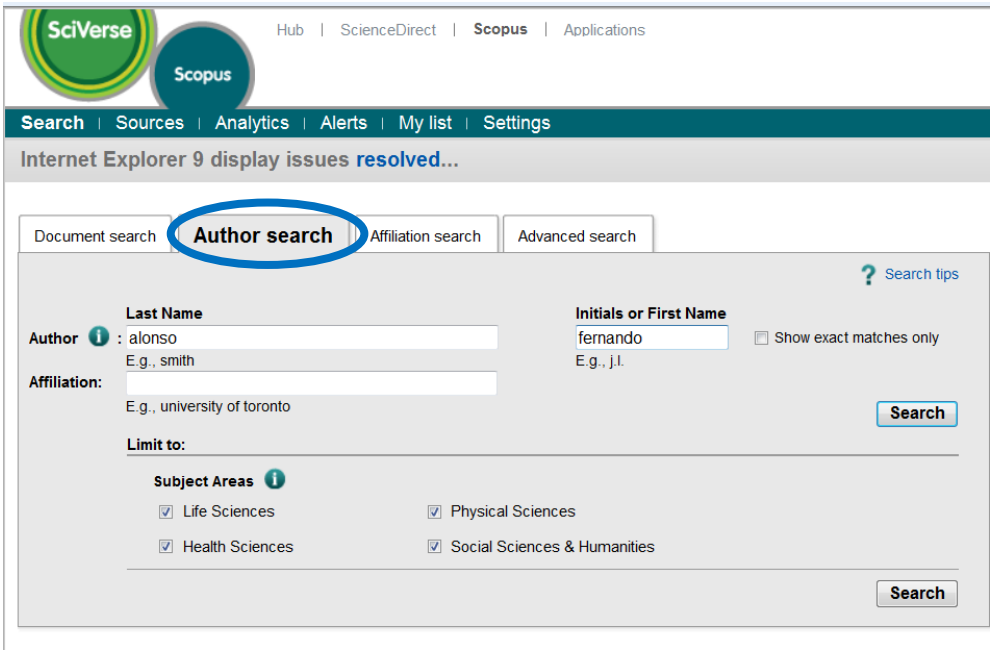
IDS es el código que identifica un artículo. Se puede encontrar al final del registro.

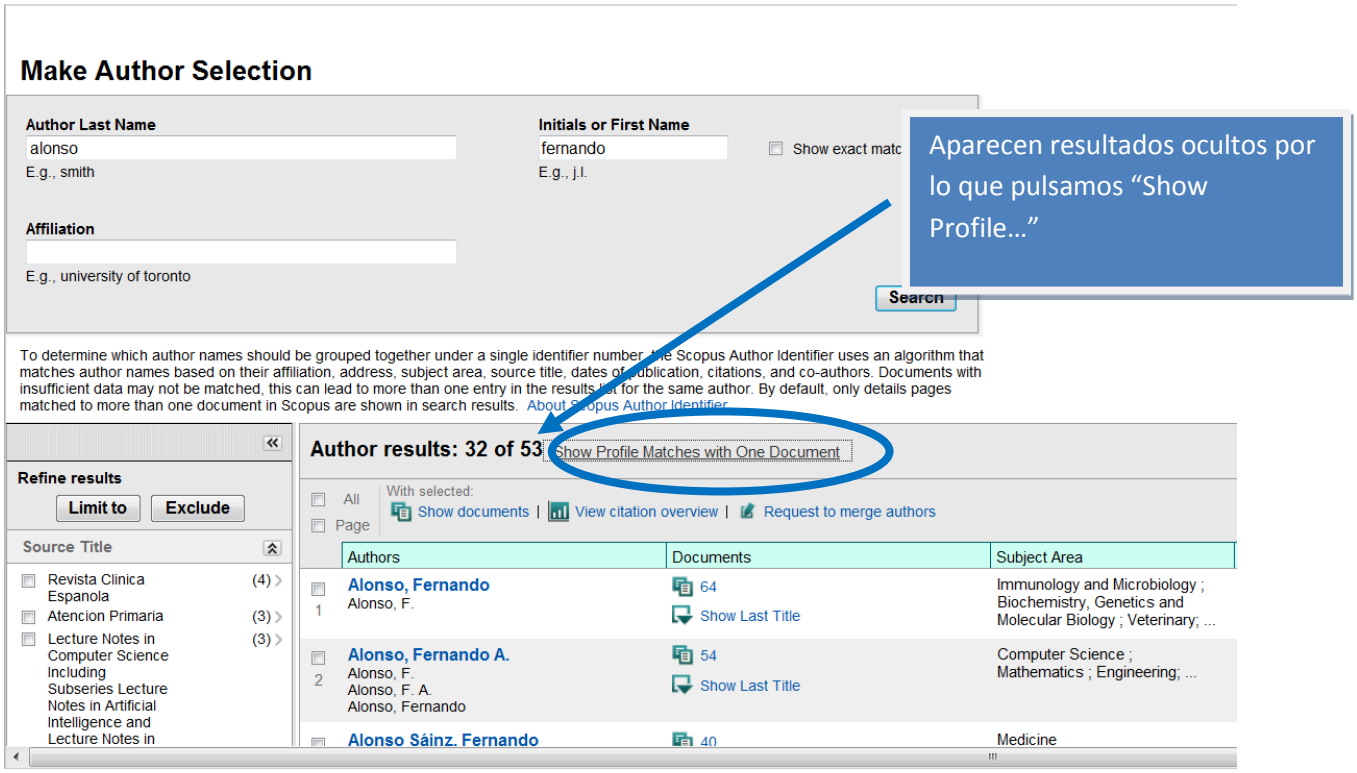
Se debe rellenar un formulario por cada artículo cuyos datos deseemos cambiar.

También se puede usar la herramienta ResearcherID (http://www.researcherid.com) para unificar toda la producción científica aún cuando se usen varias firmas.

Cómo modificar nuestra firma en Scopus

Realizamos una búsqueda por autor:





Make Author Selection
Author Last Name
alonso
E.g., smith
Initials or First Name
fernando
E.g., j.l.
Show exact matc
Affiliation
E.g., university of toronto
Search
Aparecen resultados ocultos por lo que pulsamos "Show Profile…"
To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. About Scopus Author Identifier
